

CHILDHOOD EDUCATION INNOVATIONS

Childhood Education: Innovations provides unique, stimulating information about educational programs around the world. Articles explore solutions to specific challenges affecting schools, teachers, and learners, and showcase the most recent innovations being developed and implemented to address those challenges.

Articles planned for the July/August 2023 issue:

- **Aula Global, a Groundbreaking Initiative for Learning Recovery**
Using a multi-faceted approach to address learning poverty.
- **Facilitating Supportive and Welcoming Nature-Based Learning With Autistic Students**
Through nature-based learning, children actively engage with their surroundings and make connections between their experiences and academic concepts.
- **Tales, Toys, and Traditions: Enacting a Culture of Sustainable Lifestyles**
Traditional values in many cultures prioritize a deep respect for the environment and a recognition of the interdependence between humans and the natural world.
- **Rube Goldberg Institute for Innovation & Creativity: An Interview With Jennifer George, Chief Creative Officer**
Rich learning through solving simple problems with complicated chain reaction creations inspired by Rube Goldberg.
- **An Interdisciplinary Biliteracy Sequence: Aligning Daily Instruction With the Way Young Bilingual Children Learn**
Bilingualism and biliteracy are achievable goals at an early age in culturally and linguistically diverse settings.
- **Learning to Integrate Technology in Early Math Classrooms: An Empowering Collaborative Learning Experience**
Actively engaging young students in mathematical sense-making and the sharing of ideas through technology.
- **Lessons Hong Kong Kindergarten Teachers Learned From the Pandemic**
A reflection on experiences teaching during the COVID-19 pandemic.
- **Bringing Social Robots to Preschool: Transformation or Disruption?**
An examination of the specific characteristics of social robots and how they can be used in the classroom.
- **Approach With Caution: An Innovative Educator Reviews the Impact AI Could Have on Education**
AI is going to change the way we work, live, and think.
- **Taking an Intentional Approach to Technology**
One school's approach to using and limiting technology in an education environment.
- **Building Community-School Engagement**
How a community supports the most vulnerable members of a society says a lot about how they work for the common good.
