

CHILDHOOD EDUCATION INNOVATIONS

Childhood Education: Innovations provides unique, stimulating information about educational programs around the world. Articles explore solutions to specific challenges affecting schools, teachers, and learners, and showcase the most recent innovations being developed and implemented to address those challenges.

Articles planned for the January/February 2026 issue:

Healing Beyond Words: Art and Play Are Rewriting the Future for Refugee Children

An innovative, youth-led initiative from the Youth Association for Development (YAD) is reimagining psychosocial support.

Community Keepers: Bringing Hope for Well-Being

A unique school-based mental health and well-being model.

The New ABCs: Access, Behavioral Shifts, and Collaboration in Early Childhood Education

The ThinkZone social enterprise empowers parents and educators to develop children's foundational skills.

From Challenge to Change With Flying Colors: Student-Centered Learning Model for Offline Classrooms

Designing technology and educational programs that catered specifically to learning environments without connectivity.

Inclusion, Innovation, and Impact in Education

An interview with dedicated educator, innovator, and community leader Nam Ngo Thanh.

"I'm Callin' a Meeting!": Meetings That Matter in Early Childhood

Morning meeting is where community, curriculum, relationships, and questions are constructed and examined.

Early Childhood Education in Global Society: Who Are We Missing?

Addressing early childhood education needs of refugees and children/families experiencing homelessness.

AI as a Teaching Partner: Practical Approaches for Elementary Educators

With care, teachers can harness AI to support learning, foster creativity, and build inclusive, responsive classrooms.

How Generative AI Can Make a Difference in Education Programs in the Global South

How can generative AI support educators in areas that suffer from shortages of resources and highly trained educators.

Fostering Motivation and Engagement: The Role of AI-Based Interactive Games

AI tools have the potential to allow educators to easily create interactive educational games.
